-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 06 June 2005.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-14 is/are pending in the application.

DETAILED ACTION

Election/Restrictions

1. Claims 6-14 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on June 6, 2005.

Specification

2. The disclosure is objected to because of the following informalities: On page 5, line 15 of the Specification, element "43" can not be found in the figures. Also, support pad has been labeled and describe as element "3" throughout the specification.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. Claims 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2 is inaccurate because the "support piece" (17) doesn't extend around a wearer's heel as claimed.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3728

5. Claim 1 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by US 737959 (Posner).

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over US 543179 (Sessler).

Sessler teaches a shoe having a pocket on each side, a support piece in each pocket having an ankle support (A) and legs (A4) having a predetermined stiffness necessary to support the ankle bone (see lines 44-46). Sessler doesn't shoe the footwear having a plurality of lace holes extending in two front rows but it old and conventional in the art for footwear to having a plurality of lace holes extending in two front rows. Therefore, to the extent, that Sessler doesn't teach this, it would be obvious to one of ordinary skill in the art to provide the footwear of Sessler with a plurality of lace holes extending in two front rows, to facilitate closing the footwear around the foot.

8. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over either Sessler or Posner as applied to claim 1 above, and further in view of Official Notice.

The examiner takes official notice that it is old and conventional in the art to provide footwear cover member (shoe upper) with a support pad in a lower rear portion (such as a heel counter or such) to provide additional support and comfort to the

Art Unit: 3728

wearer. Therefore, it would have been obvious to provide the cover member of either Sessler or Posner with a support pad in a lower rear portion.

Allowable Subject Matter

9. Claims 4 and 5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

10. Applicant is duly reminded that a complete response must satisfy the requirements of 37 C.F. R. 1.111, including:

-“The reply must present arguments pointing out the *specific* distinctions believed to render the claims, including any newly presented claims, patentable over any applied references.”

–“A general allegation that the claims define a patentable invention without specifically pointing out how the language of the claims patentably distinguishes them from the references does not comply with the requirements of this section.”

-Moreover, “The prompt development of a clear issue requires that the replies of the applicant meet the objections to and rejections of the claims. Applicant should also specifically point out the support for any amendments made to the disclosure. See MPEP 2163.06” MPEP 714.02. The “disclosure” includes the claims, the specification and the drawings.

11. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
